Pattarapon Kreepan

Software Developer

Driven Computer Science graduate with hands-on internship experience and a strong passion for pursuing a career as a Software Developer. Eager to work in a professional tech environment, I am motivated to develop practical solutions, enhance my coding skills, and continuously learn new technologies. I am ready to take on new challenges and grow into an adaptable and dependable Software Developer.

EXPERIENCE

December 2024 - January 2025

Front-End Developer Internship

- Learned the overall front-end development structure and workflow of web-based systems.
- Collaborated with the team to deliver assigned website components according to project needs.

February 2025 - March 2025

Back-End Developer Internship

- Gained understanding of the backend team's workflow and system structure.
- Prepared mock data to support development, testing, and feature validation.

June 2025 - March 2026

DevOps Engineer Internship

- Implemented observability solutions using OpenTelemetry to enhance monitoring and system visibility.
- Configured CloudWatch Logs backup to Amazon S3 for log archival and retention.
- Automated dependency cache download, checking, and issue fixing in Jenkins pipelines to support smoother CI/CD processes.
- Deployed the AI SA MOM project on AWS Elastic Beanstalk, supporting application deployment and environment configuration.

PROJECTS

Senior Research Project – Chiang Mai University
Observability in Microservice Deployment Using OpenTelemetry

- Researched the implementation of OpenTelemetry to enhance observability in microservice-based systems.
- Conducted deployment and testing in both on-premises and cloud environments, including AWS EC2 and Amazon EKS.
- Assessed telemetry collection and monitoring across logs, metrics, and traces to improve system visibility and support performance analysis.

K-CAMT Winter Hackathon with Inha University
SMART FARM (Smart Aquaponics System)

- Developed a smart aquaponics system combining a fish tank and planter.
- Automated plant irrigation using water from the fish tank.
- Implemented automatic tank refill to maintain water levels.
- Reused fish waste water as natural fertilizer for plant growth.

EDUCATION

Chiang Mai University

Bachelor of Science in Computer Science, College of Arts, Media and Technology (CAMT)
GPA 2.99

ADDITIONAL

Technical Skills

Java, Terraform, AWS manage, Docker, Kubernetes, React, JavaScript, Jenkins, Git, Sql, Postman

Languages

- Thai
- English
